

## PROJECT TEAM

First Canadian Place has assembled the foremost authorities in **architecture, design, construction and sustainability** for the rejuvenation of this iconic property.

### **BREGMAN + HAMANN (B+H)**

#### Production Architect

B+H is one of Canada's largest and longest established full services architectural practices. With a legacy that spans over 56 years, B+H are renowned for such landmark projects including First Canadian Place and their collaborative work on the Royal Ontario Museum. The firm brings Canadian design, problem-solving and

construction skills to large-scale, technically complex projects across the globe. The firm's current award winning portfolio includes the Hong Kong New World Tower in Shanghai, La Residence at Lotus in Dubai and many Canadian buildings such as the Metro Convention Centre's South Building and Sheridan Centre for Animation.

### **MOED DE ARMAS & SHANNON**

#### Design Architect

Founded in 1991, Moed de Armas & Shannon have designed and completed numerous leading-edge architectural and interior projects for an impressive roster of major financial institutions, medical institutions and development companies.

Recently completed projects include the high profile renovation of the General Motors Building and Plaza, the MetLife Building at 200 Park Avenue, 1095 Avenue of the Americas and 100 Park Avenue.

### **ELLIS DON**

#### Construction Manager

Ellis Don is one of the largest building contractors in Canada and privately-owned construction companies in North America, carrying out approximately \$2.25 billion in residential, commercial, office, hospital, industrial, civil

and institutional construction projects annually. Since 1951, Ellis Don has built a reputation for working with clients to deliver high quality projects on-time and on budget.

### **HALCROW YOLLES**

#### Structural Engineer

With an award winning portfolio of projects, Halcrow Yolles combines technical strength, innovative and functional design and superior client service to deliver distinctive, sustainable developments worldwide. Recognized internationally as one of the world's premier consulting engineering practices, Halcrow Yolles is synonymous with building engineering. The firm's key advantage lies in their established

record with large and complex commercial projects, tall building issues such as the design of economical wind and seismic resisting systems and the efficient use of steel and concrete floor plate configurations. Halcrow Yolles' portfolio includes such notable projects as Brookfield Place in Toronto and World Financial Center in New York City and more recently The Bow in Calgary and Battery Park Site 26 in New York City.

### **BROOK VAN DALEN**

#### Engineering Consultant

Brook Van Dalen & Associates Limited is an engineering firm providing specialized consultation on the design and performance of building envelope systems with offices in Toronto and Ottawa. The firm are recognized experts in the investigation, design and construction review, and research services associated with such systems as metal and glass

curtain walls, skylights, masonry and precast wall systems. Founded in 1993, the firm's practice has specialized in all aspect of building façade design. One of the firm's most recent assignments included the review one of Canada's largest and most complex new curtain wall projects at Lester B Pearson Airport's new terminal.

### **PYLON DESIGN**

#### Marketing Consultant

Pylon is an internationally award-winning graphic design firm with extensive expertise in business-to-business brand development and corporate publications. With a core clientele base of leading commercial real estate company and professional

service firms, Pylon has earned a reputation for providing dynamic communications solutions, excellent project management and attentive client service.
